petanikode.com because clear

Exercise 17: Find a website then analyze whether the website is considered good

(refer to the criteria you have listed on exercise 10 above). You can use the below

cues to start your review:

- What is the address of website? *w3schools.com*
- Do you like the website? Why or why not? *yes, because it really helpful to ~~find~~ find programming language resources.*
- What makes the website good or bad?
- What are your suggestions to make the website better?

→ good : - the website provides examples of Java programming language and many more for beginners.
 - it primarily function as a guide
 - its emphasis on interactive learning than the other websites.
 - by clicking the "try it yourself" button you can experiment with the code.

bad : the website's navigations has been found to be less intuitive, making it harder to find specific content or tutorials for beginners.

→ more exercise ~~the~~ using daily study case.
